Quick Reference — All Blocks at a Glance

19 blocks total (0–18 + 17i) + dynamic background covering the full page.

Block	Name	How calculated	AI	Options / Variants
BG	Dynamic Background	Priority rules + panchang + scores	✗	20 base themes × 3 time-of-day tints = up to 60 visual states

Block	Name	How calculated	AI	Options / Variants
0	Header	Date, name, streak, grace day flag	✗	3 greetings (Morning / Afternoon / Evening); optional 🛡️ if grace day used
1	Day Headline	panchang + avg score, priority tree	✗	8 headline types × 8 moon phase labels + social proof line
2	Today's Energy	Formula: tithi + vaara + nakshatra modifiers	✗	6 categories × 0–100 score × 3 labels
2 (on tap)	Category explanation	AI (lazy, cached per day)	✅	1 fixed text per category per day after cache
3	Energy Check-In	User picks mood emoji → compared to predicted energy band	✗	5 mood options × 3 predicted levels = 15 outcome messages
4	Do / Avoid	Tag-matching: 60 do + 60 avoid tips against today's signals	✗	Pool of 120 tips; same signals always return same 3+3
5	Daily Cosmic Pull	(nakshatra_idx × 3 + slot_idx) % 54 → card from 54-entry bank	✗	54 cards across 9 qualities; 3 pulls per day (morning / afternoon / evening); flip animation
6	Today's Vibe	AI (pre-generated nightly, cached)	✅	1 fixed text per user per day after cache
7	Your Day	Lookup table: vaara × slot × energy_band	✗	63 unique texts (7 vaara × 3 slots × 3 energy bands)
8	Power Windows	Hora cycle (Chaldean order from sunrise) + low-energy window by weekday + midday peak window	✗	5 windows per day × 7 weekdays = 35 fixed windows; current slot highlighted
9	Cosmic Body Map	Fixed 27-entry lookup: nakshatra → body area + awareness tip	✗	27 unique entries (one per nakshatra); read-only display
10	Daily Oracle	3 face-down cards derived from nakshatra group; user picks one	✗	3 cards per day; each nakshatra has a fixed set of 3 messages (deterministic)
11	Moon Streak	Check-in count + panchang tithi for icons + grace day rule	✗	Streak 0–∞; progress ring 1–30 (lunar cycle); max 1 grace/7 days
12	Achievements	Rules evaluated on each check-in	✗	~30 badge types; repeatable ones stack; View All opens full modal

Block	Name	How calculated	AI	Options / Variants
13	Compatibility Pulse	Connect onboarding check → partner chart comparison (tithi + vaara + nakshatra delta per category)	✗	CTA if not onboarded; otherwise 1–3 match cards with daily score
14	Reflect on Today	User-entered text, stored as journal entry	✗	Free text input; saved to user_reflections table
15	Ask the Stars	User types question → deterministic answer from 50-entry bank keyed to nakshatra × tithi	✗	(nakshatra_index × 3 + tithi) % 50 — same sky = same answer all day
16	Vedic Dice	(nakshatra_idx + tithi – 1) % 9 + 1 → number 1–9 with fixed meaning	✗	9 numbers × 9 meanings; 1 roll per day (resets midnight); die-roll animation
17	Tomorrow's Preview	panchang tomorrow + fixed templates (after 21:00 only)	✗	10 templates
17i	Tomorrow's Intention	User-entered text tied to tomorrow's preview headline	✗	Free text input; shown next morning as "Your intention for today"
18	Stories	Scheduled via admin + nakshatra/moon lookup	✗	4–6 cards per day (admin-controlled)

External Vedic API: not used on Today. All astronomical calculations are local (Swiss Ephemeris). **AI calls per user per day: max 7** — 1 vibe text (pre-generated) + up to 6 category explanations (on first tap only, then cached until midnight). Everything else is deterministic: same birth data + same date always returns the same result. **Interactive blocks (3, 5, 8–10, 13, 15, 16) are user-initiated** — they require a tap/action and are never auto-shown. Block 13 requires Connect onboarding to be completed; users who haven't done it see a CTA instead. Block 16 allows 1 roll per day. Block 5 allows 3 pulls per day (morning / afternoon / evening), unlocking progressively.

1. User Data We Have

```

birth_date:      YYYY-MM-DD
birth_place:     lat, lon, timezone_offset
birth_time:      HH:MM (default 12:00 if unknown)
gender:          string
pronouns:        string[]
name:            string

```

Derived once at registration and stored in **astro_data**:

```

natal_nakshatra, natal_moon_sign, natal_rising,
natal_sun_sign, natal_tithi, natal_vaara

```

3. Dynamic Background

Like weather apps — the entire Today page background changes based on the day's energy and special events. Selected deterministically, no runtime generation. The system picks an asset key; design creates the assets.

20 distinct themes × 3 time-of-day tints = up to 60 visual states per day. The base theme changes once per day at midnight. The tint layer shifts automatically with local time (morning / afternoon / evening overlay) — no extra design work, just a CSS-style color filter on the existing asset.

Background selection (priority order — first match wins)

```
function resolveBackgroundKey(context) {
  const {
    stars_align,
    is_eclipse,
    is_purnima,
    is_amavasya,
    is_nakshatra_birthday,
    is_tithi_birthday,
    is_vaara_birthday,
    is_solstice,
    today_vaara,
    scores,
    average_score,
  } = context;

  const { love, career, health, money, social, family } = scores;

  // — Priority 1: Rarest cosmic events —————
  if (stars_align) return "celestial_event"; // nakshatra+tithi+vaara all
match natal
  if (is_eclipse) return "eclipse";
  if (is_purnima) return "full_moon";
  if (is_amavasya) return "new_moon";

  // — Priority 2: Personal special days —————
  if (is_nakshatra_birthday) return "star_day";
  if (is_tithi_birthday) return "lunar_birthday";
  if (is_vaara_birthday) return "your_day";
  if (is_solstice) return "solar_gate";

  // — Priority 3: Vaara themes – conditional on ruling category High –
  // Each vaara only gets its special background when the category
  // it rules is actually High (≥71). Otherwise falls through to score.
  if (today_vaara === "Friday" && love >= 71) return "venus_evening";
  if (today_vaara === "Monday" && family >= 71) return "moon_embrace";
  if (today_vaara === "Thursday" && money >= 71) return
"jupiter_abundance";
  if (today_vaara === "Wednesday" && (social >= 71 || career >= 71))
    return "mercury_mind";
  if (today_vaara === "Tuesday" && (health >= 71 || career >= 71))
    return "mars_fire";
  if (today_vaara === "Sunday" && health >= 71) return "sun_radiance";
  if (today_vaara === "Saturday" && career >= 71) return "saturn_clarity";

  // — Priority 4: Score-based fallback —————
  if (average_score >= 80) return "golden_hour";
```

```
    if (average_score >= 65) return "clear_sky";
    if (average_score >= 50) return "overcast";
    if (average_score >= 35) return "cloudy";
    return "deep_night";
  }
```

Full asset list (20 themes — design creates these)

Cosmic events (4)

Key	Visual description	Mood
celestial_event	Shimmering aurora — gold, magenta, teal light rays on deep space	Rare / magical
eclipse	Blood-orange corona ring on black, dramatic shadow gradient	Intense / rare
full_moon	Silver-white glow bleeding into deep blue-purple	Luminous / emotional
new_moon	Near-black sky, minimal star scatter, one faint crescent	Quiet / reset

Personal days (4)

Key	Visual description	Mood
star_day	Deep cosmic purple, scattered star bursts, one bright star focal point	Personal peak
lunar_birthday	Moonlit silver-blue gradient, soft glow, intimate	Reflective
your_day	Warm sunrise gradient, amber-to-rose, gentle rays	Celebratory
solar_gate	Prismatic white-gold light beams, clean and radiant	Transformative

Vaara themes (7 — conditional)

Key	Planet	Visual description	Mood
venus_evening	Venus ♀	Rose-pink to warm gold, soft bokeh, romantic	Warm / romantic
moon_embrace	Moon ☾	Cool silver mist, blue-white gradient, soft glow	Nurturing / calm
jupiter_abundance	Jupiter ♃	Royal deep blue with gold veining, expansive	Optimistic / grand
mercury_mind	Mercury ☿	Electric teal and mint green, crisp lines	Alert / clever
mars_fire	Mars ♂	Deep red-orange ember glow, dark edges	Driven / intense

Key	Planet	Visual description	Mood
sun_radiance	Sun ☀	Bright white-gold, radiant sunburst, energizing	Vital / clear
saturn_clarity	Saturn ♄	Midnight blue, fine crystalline texture, structured	Disciplined / cool

Score-based fallback (5)

Key	Trigger	Visual description	Mood
golden_hour	avg ≥ 80	Warm amber and soft orange, sun-glow	Peak energy
clear_sky	avg 65–79	Soft blue to lavender, gentle and open	Positive / flowing
overcast	avg 50–64	Light grey-blue with soft light diffusion	Neutral / steady
cloudy	avg 35–49	Muted cool grey tones, subdued	Cautious / muted
deep_night	avg < 35	Dark navy to indigo, minimal	Low / restful

Time-of-day tint layer

On top of the base background, apply a lightweight color overlay that shifts with local time. This gives continuous visual change through the day at zero design cost.

Morning	(midnight – noon)	→ warm amber overlay	opacity 0.12
Afternoon	(noon – sunset)	→ neutral / no tint	opacity 0.00
Evening	(sunset – midnight)	→ deep indigo overlay	opacity 0.15

Rules

- Base background key determined **once per day** at midnight, stored in `today_summary_cache`.
- Time-of-day tint is applied client-side based on current local time — no cache needed.
- Transition: 0.8s fade when app opens and background key has changed since last visit.
- Tint shift (morning → afternoon → evening): 1.5s slow fade so the user notices the change gradually.

4. Block-by-Block Technical Spec

Block 0: Header & Streak Badge

AI: NO — pure data display.

"{weekday}, {Month} {day}"	← from today_date
"Good {Morning Afternoon Evening}, {name}"	← from local time + user name
🔔 ← notification bell	

🛡️ ← shown only when grace day was used in the current 7-day period
 🔥 {streak}-day ← from user_checkins table

Check-in is recorded automatically when user opens the Today page. No action required.

Grace Day Rule

A user gets **one grace day per 7-day rolling period**. If they miss a single day:

```

grace_available = (grace_used_count_in_last_7_days == 0)

If grace_available AND days_missed == 1:
  → streak is NOT reset
  → grace_used = true for this period
  → 🛡️ icon appears in header and Moon Streak block
  → text: "Your streak was protected yesterday. One grace day used this week."

If grace_not_available OR days_missed > 1:
  → streak resets to 0 (or 1 on today's check-in)
  
```

Grace status is stored in `user_checkins.grace_used_at`. The 7-day window is a rolling window (not calendar week).

Block 1: Day Headline

AI: NO — fully deterministic.

Algorithm

1. Compute `average_score` = mean of 6 category scores (see Block 2)

2. Select `headline_type` by priority:

<code>stars_align</code>	→ "🌟 Your Special Day"
<code>is_purnima</code>	→ "🌕 Full Moon Day"
<code>is_amavasya</code>	→ "🌑 New Moon Day"
<code>is_nakshatra_birthday</code>	→ "🌟 Your Star Day"
<code>is_tithi_birthday</code>	→ "🎂 Lunar Birthday"
<code>average_score >= 75</code>	→ "⚡ High Energy Day"
<code>average_score >= 50</code>	→ "🌊 Flow With It"
<code>else</code>	→ "🌙 Rest & Reflect"

3. Subtitle — fixed template map:

"High Energy Day"	→ "The stars are working for you today"
"Flow With It"	→ "A steady day — go with the current"
"Rest & Reflect"	→ "A quiet day. Good for inner work"

```

"Full Moon Day"      → "Peak energy. Emotions run high"
"New Moon Day"       → "Time to set new intentions"
"Your Star Day"      → "Today's sky matches your birth sky"
"Your Special Day"   → "A rare alignment – happens only a few times a
year"
"Lunar Birthday"     → "The moon returns to your birth phase"

```

4. Info line – constructed from parts:

```
"{today_vaara} · {moon_phase_label} · {countdown_label}"
```

5. Social proof line – shown below the info pill:

```
"🌍 {n} people are having a {label} day today"
```

n is derived deterministically:

```

average_score >= 75 → base 8400 + (tithi × 187)
average_score 50–74 → base 14200 + (tithi × 231)
average_score < 50  → base 4100 + (tithi × 93)

```

label:

```

average_score >= 75 → "High Energy"
average_score 50–74 → "flowing"
average_score < 50  → "quiet"

```

This number is the same for all users with similar scores on the same day.

It creates a sense of community without requiring real-time data.

moon_phase_label:

```

tithi 1–7   → "Waxing Crescent"
tithi 8     → "First Quarter"
tithi 9–14  → "Waxing Gibbous"
tithi 15    → "Full Moon"
tithi 16–22 → "Waning Gibbous"
tithi 23    → "Last Quarter"
tithi 24–29 → "Waning Crescent"
tithi 30    → "New Moon"

```

countdown_label (show only when ≤ 3 days away):

```

"Full Moon tomorrow"
"Full Moon in 2 days"
"New Moon tomorrow"
etc.

```

Block 2: Today's Energy (6 categories)

AI: NO — deterministic scoring algorithm.

Same input → always same output.

Categories and their Vedic house mapping (shown only in expanded tap view)

Category	Vedic ruler	House
Love	Venus (Shukra)	7th
Career	Saturn (Shani)	10th
Health	Sun (Surya)	1st
Money	Jupiter (Guru)	2nd
Social	Mercury (Budha)	11th
Family	Moon (Chandra)	4th

Score formula

```
raw_score = 50 + tithi_modifier + vaara_modifier + nakshatra_modifier +
birthday_bonus
final_score = clamp(raw_score, 0, 100)
```

Tithi modifiers (Shukla paksha / waxing half)

Tithi	Love	Career	Health	Money	Social	Family
Pratipada (1)	0	+10	0	+5	0	0
Dwitiya (2)	+5	0	0	0	+10	+10
Tritiya (3)	0	+15	+10	0	0	0
Chaturthi (4)	0	-10	0	-10	0	0
Panchami (5)	0	+15	0	+10	0	0
Shashthi (6)	+5	0	0	+15	0	0
Saptami (7)	+10	0	0	0	+15	0
Ashtami (8)	-5	+5	+10	0	0	0
Navami (9)	0	-10	0	0	0	0
Dashami (10)	0	0	0	+15	0	+10
Ekadashi (11)	0	+10	+15	0	0	0
Dwadashi (12)	+10	0	0	0	+5	0
Trayodashi (13)	0	0	+5	0	0	+10
Chaturdashi (14)	-5	-5	-5	-5	-5	-5
Purnima (15)	+15	+15	+15	+15	+15	+15

Krishna paksha (waning, tithi 16–30): use the same tithi name as the Shukla table above, but apply a –5 adjustment to every non-zero modifier. Specifically: a +15 becomes +10, a +10 becomes +5, a +5 becomes 0, a 0 stays 0, and a –5 stays –5 (do not make negatives more negative). Exception — Amavasya (tithi 30): Social –15, Love –5, Health +5 (fixed values, not derived from the Shukla table).

Example: Saptami (7) in Shukla has Love +10. Saptami in Krishna → Love +10 – 5 = +5.

Vaara (weekday) modifiers

Vaara	Planet	Love	Career	Health	Money	Social	Family
Sunday	Sun	0	+5	+10	0	0	0
Monday	Moon	+10	0	0	0	+5	+15
Tuesday	Mars	–5	+10	+15	0	0	0
Wednesday	Mercury	0	+15	0	+5	+10	0
Thursday	Jupiter	0	+10	0	+15	0	+5
Friday	Venus	+20	0	0	+5	+15	0
Saturday	Saturn	–10	+5	0	–5	0	0

Nakshatra modifiers (today's Moon nakshatra)

Nakshatra	Love	Career	Health	Money	Social	Family
Ashwini	0	0	+15	0	0	0
Bharani	+10	+10	0	0	0	0
Krittika	0	+15	0	0	–5	0
Rohini	+15	0	0	+10	0	0
Mrigashira	0	+5	0	0	+10	0
Ardra	0	–5	–5	0	+5	0
Punarvasu	0	0	+10	0	0	+15
Pushya	+15	0	0	0	+10	+15
Ashlesha	–5	+10	0	0	0	0
Magha	0	+15	0	0	+5	0
Purva Phalguni	+15	0	0	+5	+15	0
Uttara Phalguni	0	+15	0	0	0	+10
Hasta	0	+10	0	+15	0	0
Chitra	+10	+15	0	0	+10	0

Nakshatra	Love	Career	Health	Money	Social	Family
Swati	0	0	0	+15	+10	0
Vishakha	+10	+15	0	0	0	0
Anuradha	+15	0	0	0	+15	0
Jyeshtha	0	+10	0	0	-5	0
Mula	0	-5	-5	0	0	0
Purva Ashadha	+5	+10	0	0	0	0
Uttara Ashadha	0	+15	+10	0	0	0
Shravana	0	0	0	0	+15	+10
Dhanishtha	0	+10	0	+15	0	0
Shatabhishak	0	+5	+15	0	0	0
Purva Bhadrapada	-5	+5	0	0	0	0
Uttara Bhadrapada	0	0	+10	0	0	+15
Revati	+15	0	0	0	+15	0

Birthday bonuses

is_nakshatra_birthday	→ all categories +10
is_tithi_birthday	→ Love +15, Family +10
is_vaara_birthday	→ Career +10, Social +10
stars_align	→ all categories +20

Score → Label

score >= 71	→ "High Energy"	(green)
score 41-70	→ "Moderate"	(yellow)
score <= 40	→ "Low Energy"	(red)

Category detail view (on tap) — AI: YES, cached

INPUT:
category, score, label, vaara, vaara_planet, tithi_name, nakshatra, birthday_flags, pronouns
SYSTEM PROMPT:
"Write 2 sentences explaining why {category} energy is {label} ({score}%) today. Mention the planetary

and lunar influences naturally. Warm and practical.
No Sanskrit jargon in main text. Use {pronouns}."

CACHE: per user per day per category (6 calls/day/user).
Stored in today_summary_cache until next midnight.

Block 3: Energy Check-In

AI: NO — fully deterministic comparison between predicted energy band and user-selected mood.
Placement: Directly below Block 2 (Energy). **Purpose:** Makes the page interactive immediately after the energy section; builds a personal accuracy log over time; increases daily return motivation.

Behaviour

- 1. The block shows the predicted energy label (High / Moderate / Low) derived from Block 2's average score.
- 2. Five mood buttons are displayed face-up: 😴 Drained · 😐 Flat · 😊 Okay · ⚡ Energized · ✨ Electric.
- 3. User taps one mood — the buttons are replaced with a result card.
- 4. The result card shows a match label + one sentence based on the alignment between predicted and actual.
- 5. A small footer shows the running accuracy streak ("Building your accuracy score · N days tracked").
- 6. User can tap ↺ to reset their pick for the same session (does not affect stored data).

Outcome matrix

Predicted	Actual mood	Label	Message
High	Energized / Electric	In sync ⚡	Your inner state matched the cosmic forecast today.
High	Flat / Drained	Off today	The stars promised more. Your body had other plans. Noted.
Low	Drained / Flat	Confirmed	A quiet day — the stars read you right.
Low	Energized / Electric	Surprise ✨	Stronger than predicted. Something is shifting in your favour.
Moderate	Flat / Okay / Energized	Right on	Steady alignment between forecast and reality.
Any	Okay (middle)	Close	Small gap between forecast and reality — that's normal.

Storage

```

user_checkins table (existing) → add column:
  mood_key:      ENUM('drained','flat','okay','energized','electric')
  nullable
  mood_picked_at: TIMESTAMP  nullable

```

No separate table needed. If **mood_key** is null the block shows the picker; if set it shows the result card.

Block 4: Do / Avoid

AI: NO — fully deterministic. Same input always returns the same 3 Do and 3 Avoid items.

How it works

Each tip in the content set has a fixed list of **tags** — conditions under which it is relevant. The selection algorithm scores every tip against today's active signals and picks the top 3 by match count. When two tips have the same score, the one that appears earlier in the fixed-order content list wins (stable sort). No randomness is involved at any stage.

Step 1 — Tag vocabulary (full list)

All tags used in the content set. No other tag names are allowed.

Vaara tags (7):

Sunday, Monday, Tuesday, Wednesday, Thursday, Friday, Saturday

Paksha tags (2):

Shukla ← waxing moon (tithi 1–14)
 Krishna ← waning moon (tithi 16–29)

Special tithi tags (2):

Purnima ← Full Moon (tithi 15)
 Amavasya ← New Moon (tithi 30)
 Chaturdashi ← 14th tithi (intense, day before Full/New Moon)

Nakshatra quality tags (2 — group the 27 nakshatras, don't tag individually):

Nakshatra_Dev ← benevolent nakshatras: Ashwini, Mrigashira, Punarvasu, Pushya, Hasta, Swati, Anuradha, Shravana, Revati
 Nakshatra_Intense ← demanding nakshatras: Bharani, Kritika, Ardra, Ashlesha, Magha, Vishakha, Jyeshtha, Mula, Shatabhishak, Dhanishtha, Chaturdashi-linked ones

Category energy tags (12 — only High and Low; Moderate has no tag):

Love_High, Love_Low
 Career_High, Career_Low
 Health_High, Health_Low
 Money_High, Money_Low

```
Social_High, Social_Low
Family_High, Family_Low
```

Personal special day tags (4):

```
NakshatraBirthday ← today nakshatra == natal nakshatra
TithiBirthday      ← today tithi == natal tithi
VaaraBirthday      ← today vaara == natal vaara
StarsAlign         ← all three match simultaneously
```

Step 2 — Build today's active signals

Signals are derived entirely from panchang and natal comparison. Same for every user with the same birth data on the same day.

Active signals = union of:

- today's vaara tag
- paksha tag (Shukla or Krishna)
- Purnima and/or Amavasya if applicable
- Chaturdashi if tithi is 14 or 29
- Nakshatra_Dev or Nakshatra_Intense based on today's moon nakshatra
- category tags where score is High (≥ 71) or Low (≤ 40) for each of 6 categories
- NakshatraBirthday / TithiBirthday / VaaraBirthday / StarsAlign if true

Step 3 — Score and select

Every tip carries a **tags** list. Score = number of active signals that appear in the tip's tags. Select top 3 by score. Ties broken by fixed position in content set (earlier wins).

Example tip:

```
text: "Reach out to someone you've been meaning to reconnect with"
type: do
tags: [Love_High, Social_High, Friday, Nakshatra_Dev]
```

```
Active signals today: [Friday, Nakshatra_Dev, Love_High, Social_High, ...]
```

```
Score: 4 matches → ranked high
```

Step 4 — Fallback hierarchy (coverage guarantee)

If fewer than 3 tips score above 0 after full matching, relax the filter:

1. Full match — use all active signals as above
2. Vaara only — if <3 results, filter to tips tagged with today's vaara alone
3. Paksha only — if <3 results, filter to tips tagged Shukla or Krishna

```
only
4. Universal    - if <3 results, fill remaining slots from tips tagged with
no
                  category or special signals (generic always-relevant
tips)
```

Every vaara must have at least 3 Do and 3 Avoid tips tagged to it alone (minimum coverage rule). Content team must verify this before publishing.

Step 5 — Determinism guarantee

Because signals are derived from panchang (no randomness) and tie-breaking is by fixed position (not insertion order or time), the same birth data + same date always produces the same 3 Do and 3 Avoid items.

Step 6 — Display tags under each tip (UI)

Each tip renders a row of 2–3 small pill-tags that explain *why* this tip was selected. These are user-friendly translations of the internal tags — not the raw tag names.

Internal tag → Display tag	
Friday	→ "Friday"
Love_High	→ "Love ↑"
Love_Low	→ "Love ↓"
Career_High	→ "Career ↑"
Purnima	→ "Full Moon"
Amavasya	→ "New Moon"
Chaturdashi	→ "Chaturdashi"
Shukla	→ "Waxing Moon"
Krishna	→ "Waning Moon"
Nakshatra_Dev	→ "{nakshatra_name}" (e.g. "Pushya")
Eclipse	→ "Eclipse"
StarsAlign	→ "Rare Alignment"
NakshatraBirthday	→ "Star Day"

Show maximum 2–3 tags per tip. Priority: special event tags > category energy tags > vaara/paksha tags. Do tips use green pills; Avoid tips use amber pills.

Block 5: Daily Cosmic Pull

AI: NO — fully deterministic. Card selected from a fixed bank of 54 entries using nakshatra × time-slot index. **Placement:** After Block 4 (Do / Avoid), before Block 6 (Today's Vibe). **Purpose:** The highest-frequency interactive block on the page. Users can pull 3 cards per day (morning / afternoon / evening), each revealing a different quality and guidance message for that window. **This is the primary daily return driver** — there is always a new card waiting as the day progresses. The pull gesture (swipe up or tap-to-flip) is the most tactile and shareable interaction in the app.

What is displayed

A face-down card with a pull prompt. Once pulled:

- A Vedic symbol/icon (distinct per quality)
- A one-word quality: e.g. "CLARITY", "ACTION", "PATIENCE"
- A 2–3 sentence guidance message

- Attribution: {nakshatra} · {time_slot}

Three-pull-per-day mechanic

Pull	Available	Resets
Morning pull	From midnight	N/A (first of day)
Afternoon pull	From 12:00 noon	N/A
Evening pull	From 18:00	N/A

All three reset at midnight. This means:

- A user who pulls at 9 AM will have 2 more pulls available later
- A user who opens at 8 PM for the first time can pull all 3 at once (all windows have passed — all are available)
- In the demo: all three are always available; the current timeOfDay slot is pre-selected

Card selection algorithm

```
nakshatra_idx  = canonical nakshatra index (0-26)
slot_idx       = { morning: 0, afternoon: 1, evening: 2 }
card_idx       = (nakshatra_idx * 3 + slot_idx) % 54
card           = PULL_CARD_BANK[card_idx]
```

Each nakshatra × slot combination always returns the same card. The 54-entry bank covers all 27 nakshatras × 2 "cycles" ensuring variety across consecutive days.

Quality categories (9 qualities, 6 cards each = 54-entry bank)

Quality	Symbol	Archetype
Clarity	💠	Cut through confusion; see what's true
Action	⚡	Move now; momentum is available
Patience	🌿	Hold steady; this is not the moment to push
Connection	💛	Reach out; relationships are amplified

Quality	Symbol	Archetype
Rest	🌙	Restore; doing less achieves more today
Courage	🔥	Face what you've been avoiding
Gratitude	✦	Notice what's working; appreciation compounds
Boundaries	🛡️	Protect your energy; it's okay to say no
Trust	🌊	Release control; the outcome is unfolding correctly

Each quality has 6 unique messages — different framing, same essence. The bank is stored as a constant array in the codebase.

Flip animation

- 1. User taps "Pull card" or swipes up on the face-down card
- 2. Card flips on its Y-axis (CSS 3D transform, 400ms)
- 3. Front (dark, ✦ symbol) rotates away; back (coloured by quality) rotates in
- 4. Quality word fades in, then message slides up
- 5. After reveal: card stays face-up for the session; pull button becomes "Pulled ✓" for that slot

Storage

```
user_checkins → add column:
  pull_morning_idx: SMALLINT nullable      (card index used for morning
pull, null = not pulled)
  pull_afternoon_idx: SMALLINT nullable
  pull_evening_idx: SMALLINT nullable
  pull_morning_at: TIMESTAMP nullable
  pull_afternoon_at: TIMESTAMP nullable
  pull_evening_at: TIMESTAMP nullable
```

Storing the index (not the text) allows card bank updates without breaking historical data.

Block 6: Today's Vibe

AI: YES — generated once per day, cached until midnight.

```
INPUT (structured):
  vaara, vaara_planet, tithi_name, nakshatra,
  average_score, headline_type, top_category,
  name, pronouns, birthday_flags

SYSTEM PROMPT:
  "Write a 2-3 sentence daily energy summary for an astrology
  app. Base it only on the facts provided. Warm, friendly,
  practical tone. Mention the weekday and moon phase naturally.
```

Do not use Sanskrit terms in the main text. Use {pronouns}."

OUTPUT: 2–3 sentences. Cached in today_summary_cache.

Block 7: Your Day (Morning / Afternoon / Evening)

AI: NO — fully deterministic. All three sections are always visible. Same input always returns the same text.

How it works

Each time slot (Morning, Afternoon, Evening) has one text determined by two inputs:

- 1. **today_vaara** — the weekday (Sunday through Saturday) — primary key
- 2. **energy_band** — derived from average category score: **High** (≥ 71) / **Moderate** (41–70) / **Low** (≤ 40)

The lookup is: `text = TEMPLATES[vaara][slot][energy_band]`

There is exactly **one text** per combination. No arrays, no random pick. Every day of the week has its own distinct set of texts, so even with the same energy level, Monday reads differently from Friday. A user on High-energy Tuesday always sees the same Tuesday High-energy texts — deterministic and personal.

Full lookup table (63 texts)

Sunday (Sun)

Slot	High	Moderate	Low
Morning	Sun's energy is at its peak. Ideal for physical activity, self-care rituals, and setting clear intentions for the week.	A calm Sunday morning. Good for gentle movement, reflection, and preparing for the week ahead.	The Sun is gentle today. Rest in the morning and let energy build naturally before noon.
Afternoon	Sun's vitality shines through the afternoon. A great time to pursue health goals and express yourself.	A steady Sunday afternoon. Good for personal projects and anything that nourishes you.	Keep the afternoon light. Napping or slow walks serve you better than ambitious plans.
Evening	Bright Sunday evening — social energy is unexpectedly high. Connect with people who energize you.	Wind down gently tonight. Prepare mentally for the week ahead.	Rest is the best use of this evening. Early to bed and tomorrow opens better.

Monday (Moon)

Slot	High	Moderate	Low
------	------	----------	-----

Slot	High	Moderate	Low
Morning	Moon energy is at its strongest this morning. Let feeling lead your decisions — your intuition is sharp.	A reflective Monday morning. Set your emotional tone for the week and don't rush.	The Moon is waning in strength this morning. Take it slow and avoid confrontations early.
Afternoon	Emotional intelligence is your superpower this afternoon. Family and connection conversations go well.	Moon's midday phase — good for nurturing tasks and checking in with people you care about.	Low moon energy in the afternoon. Stick to routine; creative or emotional work can wait.
Evening	Moon evenings are made for family and close connection. Reach out to someone you love tonight.	A gentle Monday night. Good for journaling or quiet conversation.	Rest tonight. The Moon needs to recover, and so do you.

Tuesday (Mars)

Slot	High	Moderate	Low
Morning	Mars gives you an early burst of power. Tackle the hardest task on your list before 10 AM.	Some Mars energy available — good for physical activity and focused work this morning.	Mars is subdued today. Don't force early intensity — pace yourself.
Afternoon	Mars energy stays strong. Good for athletic effort, direct conversations, and getting things done.	A decent work afternoon. Push through the medium-difficulty tasks on your list.	Low energy Tuesday afternoon. Avoid confrontation and rest between tasks.
Evening	Mars evening — good for assertive decisions you've been postponing. Act on what you already know.	Wind down well. Light exercise helps process today's drive before sleep.	Low Mars evening. Rest and let the drive return tomorrow.

Wednesday (Mercury)

Slot	High	Moderate	Low
Morning	Mercury sharpens your mind this morning. Write, plan, communicate — ideas flow easily today.	A decent morning for organized thinking. Handle correspondence and planning before noon.	Mercury is quiet this morning. Re-read before sending and avoid important negotiations.
Afternoon	Mental energy peaks. Best time for strategy sessions, deep writing, or complex problem-solving.	A steady afternoon for methodical work. Good for following up and tying loose ends.	Mercury slows this afternoon. Short tasks over deep work.

Slot	High	Moderate	Low
Evening	Mercury evening — excellent for clever conversation, pitching ideas, and social wit.	A decent evening for casual connection and light reading.	Mercury is tired tonight. Rest your mind and return to complex topics tomorrow.

Thursday (Jupiter)

Slot	High	Moderate	Low
Morning	Jupiter expands everything it touches today. Morning decisions carry long-term weight — think big.	Jupiter's optimism is available but mild. Good for practical planning and financial decisions.	Jupiter is restrained this morning. Hold off on large commitments — better timing comes.
Afternoon	Jupiter's afternoon energy is excellent for growth conversations, teaching, and financial moves.	A good Thursday for routine work and steady progress toward larger goals.	Low Jupiter energy this afternoon. Avoid overcommitting or expanding plans today.
Evening	Jupiter evenings are generous. Good for hosting, gifting, and abundant thinking.	A pleasant Thursday evening. Good for gratitude practice and light social plans.	Low expansion energy tonight. Keep it simple and rest.

Friday (Venus)

Slot	High	Moderate	Low
Morning	Venus day starts beautifully. Good morning for self-care, beauty routines, and sending affectionate messages.	A pleasant Friday morning. Treat yourself — even a small luxury sets the right tone.	Venus is subtle this morning. Light self-care over social effort.
Afternoon	Venus energy strengthens through the day. Creative work, beauty projects, and relationship effort all go well.	A decent Friday afternoon for aesthetic and creative tasks.	Low Venus energy in the afternoon. Quiet your social battery and rest before evening.
Evening	Venus evening — the best time of the week for romance, connection, and pleasure. Go out or invite someone in.	A pleasant Friday night. Good for relaxed social plans and gentle romance.	Low energy Venus evening. Stay in and create something beautiful for yourself.

Saturday (Saturn)

Slot	High	Moderate	Low
------	------	----------	-----

Slot	High	Moderate	Low
Morning	Saturn rewards discipline today. Start with your hardest, most delayed task — you have the will for it.	A capable Saturday morning. Good for deep cleaning, long-deferred admin, and structure-building.	Saturn's heaviness is real this morning. One small, useful task is enough.
Afternoon	Saturn afternoon — persistent, focused effort pays off today. Finish what you started this week.	Steady progress Saturday. Not inspiring, but productive.	A slow Saturn afternoon. Rest without guilt — this too is part of the cycle.
Evening	Saturn evening: good for honest reflection, letting go of what isn't working, and planning the next week.	A decent Saturday night for journaling and reviewing the week.	Saturn's evening calls for rest and silence. Tomorrow will be lighter.

Timing labels

The slot names shown in the UI are time-anchored to the user's local sunrise/sunset from panchang:

```
Morning    → from local midnight until noon (or sunrise + 6h, whichever is later)
Afternoon  → from noon until sunset
Evening    → from sunset onward
```

The time boundaries are displayed next to each slot label (e.g., "Morning · until 12:30") so the user knows when each section applies.

Block 8: Power Windows

AI: NO — fully deterministic. Calculated from the Vedic hora cycle (60-minute planetary hours from sunrise) + one fixed "avoid" window per weekday + a midday peak window. All derived from weekday and local sunrise time. **Placement:** Directly below Block 7 (Your Day in Three Parts). **Purpose:** Answers the question "WHEN should I do this today?" — the most actionable question a user can have. Creates a reason to check the app in the morning and reference it throughout the day.

What is displayed

Each day shows **4–5 time windows** with plain-English titles:

Window type	User-facing title	Source	Quality
Peak hora (high-energy planet)	"High energy start", "Deep focus window", "Growth window", etc.	First hora matching Jupiter, Mercury, Venus, or Sun from sunrise	✓ peak (green)

Window type	User-facing title	Source	Quality
Best decision window	"Best decision window"	Fixed calculation: ~11:48 AM – 12:24 PM (adjusts slightly with sunrise)	✨ golden
Low energy window	"Low energy zone"	Fixed table by weekday (approx. 1.5-hour block)	⚠ avoid (red)
Medium hora	Context-specific name ("Communication window", "Gut feeling window", etc.)	2nd or 3rd useful hora of the day	✓ medium (amber)
Rest / wind-down	"Wind-down time", "Evening reflection"	Moon hora in evening	🌙 rest (blue)

Naming rule: Window titles must always be plain English — no planetary terms in titles. Technical source (hora planet, Vedic period name) may appear only in the expanded hint text, and even then should be followed by a simple explanation.

The window matching the current time of day (morning / afternoon / evening) is highlighted with a **"Now"** tag and a brighter border.

Tapping a window expands it to show a plain-English explanation of why this window is favorable or unfavorable.

Hora calculation algorithm

Chaldean order: Sun → Venus → Mercury → Moon → Saturn → Jupiter → Mars → (repeat)

- Find the planet ruling today's weekday:
Sunday=Sun, Monday=Moon, Tuesday=Mars, Wednesday=Mercury, Thursday=Jupiter, Friday=Venus, Saturday=Saturn
- That planet rules Hora 1, starting at local sunrise
- Each subsequent hora lasts exactly 60 minutes
- Cycle through Chaldean order continuously for all 24 hours
- For each pre-defined window time, find which hora is active

Low energy window table (approximate, sunrise ~6:30 AM)

Internally this is known as "Rahu Kaal" — a standard Vedic calculation for the least favorable daily window. Never shown to users by this name.

Weekday	Low energy window
Sunday	4:30 – 6:00 PM
Monday	7:30 – 9:00 AM

Weekday	Low energy window
Tuesday	3:00 – 4:30 PM
Wednesday	12:00 – 1:30 PM
Thursday	1:30 – 3:00 PM
Friday	10:30 AM – 12:00 PM
Saturday	9:00 – 10:30 AM

In production: the low energy window is calculated as $(\text{sunrise_to_sunset} / 8) \times \text{rahu_kaal_index_by_weekday}$. This is a standard Vedic formula requiring actual sunrise/sunset times.

Storage

No storage needed. Computed at render time from `vaara` + local sunrise time. Pre-computed into `today_summary_cache` alongside other daily data.

Block 9: Cosmic Body Map

AI: NO — fully deterministic. Nakshatra-to-body-part mapping is a fixed lookup table (standard Vedic system). **Placement:** After Block 8 (Power Windows), before Block 10 (Daily Oracle). **Purpose:** Shows users where today's cosmic energy lands in their body. Unique — no competitor has this. Creates a moment of self-awareness that bridges astrology and wellbeing. Read-only block; no interaction required.

What is displayed

A two-part block:

- 1. **Body focus line:** The nakshatra-governed body area for today, plain English.
- 2. **Awareness tip:** A single practical sentence — what to notice, protect, or nurture in that area today.

Visual: A simple schematic body outline (SVG) with the governed area highlighted in the day's accent colour. On the right: the text description. Tapping the highlighted zone shows the full tip.

 **PUSHYA DAY**
Body focus: chest, lungs, stomach
"Digestive energy is more sensitive today – eat lighter and avoid skipping meals"

Nakshatra → body part mapping (full 27-entry table)

Nakshatra	Body area	Awareness tip
Ashwini	head, brain	Sharp starts today — protect against headaches from over-exertion

Nakshatra	Body area	Awareness tip
Bharani	head, forehead	Mental load is heavy today — step outside and breathe
Krittika	eyes, neck, shoulders	Screen fatigue hits harder — take visual breaks every 45 min
Rohini	throat, mouth, face	Communication energy is high — use your voice deliberately
Mrigashira	throat, upper arms	Shoulders carry today's tension — stretch before bed
Ardra	shoulders, chest	Emotional weight sits in the upper body today — notice tightness
Punarvasu	fingers, lungs, ears	Breathing is shallower on Punarvasu days — slow inhales help
Pushya	chest, stomach, lungs	Digestive energy is sensitive — eat lighter and avoid skipping meals
Ashlesha	lungs, joints, knees	Joints need movement — sitting for long periods will slow you down
Magha	spine, heart	Heart energy is amplified — check in with what you're carrying emotionally
Purva Phalguni	heart, back, spine	Posture affects your mood today more than usual — stand tall
Uttara Phalguni	hands, intestines, digestion	Gut feelings are literally physical today — trust abdominal signals
Hasta	hands, bowels	Detail work with hands is energised — good day for crafting, writing, or cooking
Chitra	forehead, kidneys	Kidney energy benefits from hydration — drink more water than usual
Swati	skin, chest, kidneys	Skin is more reactive today — avoid irritants and get fresh air
Vishakha	lower abdomen, thighs	Lower body needs movement — walk, stretch legs, avoid sitting still
Anuradha	lower back, hips, thighs	Lower back tension accumulates — notice and release before evening
Jyeshtha	neck, tongue, right side	Speaking clearly matters more today — slow down before you respond
Mula	feet, lower back	Grounding energy sits in the feet — walk barefoot or get outside
Purva Ashadha	thighs, hips	Hip flexibility and movement ease the day's energy
Uttara Ashadha	thighs, knees, skin	Knees and thighs carry today's drive — move them to feel the flow

Nakshatra	Body area	Awareness tip
Shravana	ears, legs	Listening is your strongest sense today — hear before speaking
Dhanishtha	ankles, back	Ankles and calves need gentle movement — stretch before long walks
Shatabhisha	ankles, calves, circulatory	Circulation benefits from movement — avoid sitting for more than 1 hr
Purva Bhadrapada	feet, calves	Feet ground you on Purva Bhadrapada — a short walk resets your state
Uttara Bhadrapada	feet, immune system	Rest supports your immune energy today — don't push through tiredness
Revati	feet, digestive system	A gentle walk and a lighter evening meal serve you well today

Storage

No storage needed. Computed from **nakshatra** (today's value from panchang). Pre-included in **today_summary_cache** payload alongside other daily data.

Block 10: Daily Oracle

AI: NO — fully deterministic. Three cards are pre-assigned per nakshatra; card content never changes within a day. **Placement:** Between Block 7 (Your Day) and Block 11 (Moon Streak). **Purpose:** Adds a tactile, ritual-like interaction; gives the user something to think about; increases session dwell time.

Behaviour

- 1. Three face-down cards are shown. Each has a name visible on the back: **The Star, The Path, The Mirror**.
- 2. Cards flip with a CSS 3D animation when tapped.
- 3. Once one card is flipped, the other two become faded and non-interactive.
- 4. User cannot un-pick for the day (the picked state persists until midnight reset).
- 5. Below the cards: "Tap a card to reveal today's message" → changes to "✓ Your message for today" after pick.

Card assignment (deterministic)

```
nakshatra_index = index of nakshatra in canonical 27-nakshatra list (0-26)
quality_group   = nakshatra_index % 3 → 0=Deva, 1=Manava, 2=Rakshasa

For each quality group, 3 fixed card messages are stored in a lookup table:
    oracle_messages[nakshatra_name][card_index] → message string
```

The messages are pre-written for all 27 nakshatras × 3 cards = **81 unique messages**. All 81 are stored in a **ORACLE_CARDS** constant on the backend (no DB lookup needed). Same nakshatra on the same day always returns the same 3 messages.

Storage

```
user_checkins table → add column:
  oracle_card_picked: SMALLINT nullable (0, 1, or 2 – index of picked card)
  oracle_picked_at:   TIMESTAMP nullable
```

Block 11: Moon Streak + Progress Ring

AI: NO — fully deterministic.

Check-in logic

A check-in is recorded automatically when the user opens the Today page. One check-in per calendar day per user, based on the user's local date (derived from their timezone). No action required from the user.

Streak calculation

The streak is the number of consecutive calendar days (in the user's local timezone) on which the user opened the app, ending today. If a day is missed, the streak resets to 1 on the next check-in.

Progress ring

The ring shows progress within the **current lunar cycle** (29.5 days, from last Amavasya to next Purnima).

```
days_in_cycle = 29
days_elapsed  = today_tithi_number (1–30)
progress_pct   = days_elapsed / days_in_cycle
```

Ring fills up:

Amavasya (day 1)	→ 0%	
Day 7	→ 24%	
Day 8	→ 28%	
Day 15 (Purnima)	→ 52%	 → 
Day 22	→ 76%	
Day 29	→ 99%	
Amavasya again	→ 0% (ring resets with animation)	

Moon phase icon strip (last 9 days)

For each of the last 9 check-in days, show the moon phase icon for that date. Icons are real — computed from that day's tithi, not decorative.

```
function getMoonPhaseIcon(tithi_number) {
  if (tithi_number === 30) return "🌑";
  if (tithi_number <= 7) return "🌒";
  if (tithi_number === 8) return "🌓";
  if (tithi_number <= 14) return "🌔";
  if (tithi_number === 15) return "🌕";
  if (tithi_number <= 22) return "🌖";
  if (tithi_number === 23) return "🌗";
  return "🌑";
}
```

14-day progress incentive

After 7 days in a streak, a second goal appears below the ring:

```
Day 8–13: "Keep going – reach 14 days to unlock the Moonwalker badge 🌙"
Day 14:   "🎉 You made it! Moonwalker badge unlocked."
Day 15–28: Next goal appears: "Full Lunar Cycle – {n} days to go 🌕"
```

This gives a **visible next milestone** at every stage, so there is always a reason to come back.

Grace Day display in Block 6

When a grace day was used in the current 7-day rolling period, the Moon Streak block shows:

```
Grace tag: "🛡️ Protected" (next to the streak number)
Note:      "🛡️ Your streak was protected yesterday. One grace day used
this week."
```

See also Block 0 for the grace day algorithm and storage details.

Block 12: Achievements

AI: NO

Shows the 3 most recently earned badges as a horizontal row, plus a **"View all →"** button that opens the full achievements modal.

View All Achievements Modal

A full-screen overlay on the Today page showing all badges organised by category. No navigation away from the page required — modal slides up inside the phone frame.

Structure:

- **Earned, one-time:** ✓ badge on right
- **Locked:** 40% opacity, icon on right

Block 13: Compatibility Pulse

AI: NO — fully deterministic score based on panchang delta between user and each match. **Placement:** Between Block 12 (Achievements) and Block 14 (Reflect on Today). **Purpose:** Bridges the Today page with the Connect tab; creates a daily reason to open Connect; gives matched users a shared topic of conversation.

State A — Connect onboarding not completed

If `user.connect_onboarding_completed = false`, the block shows a CTA card:

See your energy match with your connections today

Compatibility changes every day based on your astrological alignment. Complete your Connect profile to unlock it.

[Complete Connect profile →]

The CTA button deep-links to the Connect onboarding flow.

State B — Connect onboarding completed

Shows 1–3 match cards (limited to current active matches in the Connect tab).

Each card displays:

- Avatar emoji + Name + Birth nakshatra
- Compatibility score (0–100) with colour-coded label
- Score label: **Strong match** (≥ 80) · **Good match** (≥ 60) · **Different energies** (≥ 40) · **Rough day for connection** (< 40)
- Tap to expand → shows one-sentence insight explaining *why* today's scores align or differ

Compatibility score algorithm

For user A and user B, on date D:

`score_A` = average of A's 6 category scores for date D

`score_B` = average of B's 6 category scores for date D

`delta` = `|score_A - score_B|`

`compat_score` = `100 - round(delta * 0.8)` // clamp to [15, 99]

The one-sentence insight is selected from a fixed insight template bank:

templates keyed by (A_band, B_band):

('high', 'high') → "Both at peak energy today – rare and powerful."

('high', 'moderate') → "{A_name}'s energy dominates today – a good listening day for {B_name}."

('high', 'low') → "Strong pull from {A_name}, quiet from {B_name} – give space."

```

('moderate', 'high') → "Their energy is higher today – let them lead the
conversation."
('moderate', 'moderate') → "Even energy – steady, comfortable day for
connection."
('moderate', 'low') → "Different rhythms today – keep interactions
light."
('low', 'low') → "Both in quiet energy – depth over activity."
etc.

```

All templates are deterministic (same inputs → same output).

Storage

No new storage needed. Compatibility score is calculated at read time from today's cached scores for both users. Results are cached in `today_summary_cache` alongside the user's own daily data.

Block 14: Reflect on Today

AI: NO — user journal entry.

Placement: After Block 13 (Compatibility Pulse), before Block 15 (Ask the Stars).

Rationale: Reflection is placed before Tomorrow's Preview because the natural flow is: *review the day* → *plan for tomorrow*. It also acts as a soft gate that makes Tomorrow's Preview feel earned rather than just visible.

UI:

REFLECT ON TODAY

```

[How did your day actually go?          ]
[                                     ] ← free text textarea
[                                     ]
                                     [ Save reflection ]

```

On save:

- Textarea is replaced by: ✓ confirmation view showing the saved text on a subtle green background
- Saved to `user_reflections` with `type = 'reflection', target_date = today`

Tone: The prompt is deliberately open-ended ("How did your day actually go?") — not "What went well?" or "What are you grateful for?" which feel forced. The goal is honest reflection, not positive spin.

Optional follow-up tomorrow: When the user opens the app the next morning, a soft nudge reads: "Yesterday you reflected: "{excerpt}..." → {link to full text}" — only if they had a low-energy or high-energy day (not moderate).

Block 15: Ask the Stars

AI: NO — fully deterministic. User types any free-text question, receives a pre-written oracular answer from a fixed 50-entry bank, selected by nakshatra × tithi. **Placement:** Between Block 14 (Reflect on Today) and Block 17 (Tomorrow's Preview). **Purpose:** Creates the feeling of mystical guidance while requiring zero AI. The ritual — typing a real question, a brief "reading" animation, a meaningful answer — is emotionally resonant and highly shareable.

Behaviour

1. User sees: title + prompt ("What's on your mind today?") + text input.
2. User types any question and taps "Ask the stars →".
3. **1.7-second reading animation:** a pulsing orb with the ✦ symbol and text "Reading {nakshatra} nakshatra..."
4. Answer is revealed with attribution: nakshatra name + tithi number.
5. Once answered, the input is replaced — the user cannot re-ask today.
6. A small note reads: *"This answer is set by today's sky. It won't change until tomorrow."*

Answer selection algorithm

```
nakshatra_idx = canonical index of today's nakshatra (0–26)
answer_idx    = (nakshatra_idx × 3 + tithi) % 50
answer        = ANSWER_BANK[answer_idx]
```

The question text is **not used for selection** — the answer is purely astronomical. This is intentional: the same cosmic sky answers everyone the same way today, regardless of what they asked. This is philosophically coherent with Vedic astrology and creates the "the stars knew what I needed to hear" moment.

Answer bank

50 unique responses covering the full spectrum of oracle archetypes:

- Direct yes / no / not-yet
- Action nudges ("Move forward. The hesitation is fear, not wisdom.")
- Patience nudges ("Wait three days. The answer will be clearer after the moon shifts.")
- Reflective / reframe ("The answer is already inside you. You're asking the stars to confirm it.")
- Mystery / trust ("This is not a door you open. It opens itself when ready.")

The bank is stored as a constant array in the codebase — no database table needed.

Storage

```
user_checkins → add column:
  star_question: TEXT nullable (the question text, stored for user's
  history)
  star_answer_idx: SMALLINT nullable (the index used, for
  audit/analytics)
  star_asked_at: TIMESTAMP nullable
```

The stored answer index allows us to reconstruct the exact answer shown to the user, even if the bank order changes (we keep a versioned snapshot).

Block 16: Vedic Dice

AI: NO — fully deterministic. Number derived from nakshatra index + tithi modulo 9, mapped to Vedic number meanings. **Placement:** After Block 15 (Ask the Stars), before Block 17 (Tomorrow's Preview).

Purpose: A tactile, one-tap daily ritual. User gets their cosmic number for the day — a number 1–9 with a short meaning. The satisfying dice-roll animation creates a habit loop. Earns an achievement on first use.

One roll per day only (resets at midnight); this scarcity drives daily return.

What is displayed

- A stylised die showing today's Vedic number (1–9)
- A one-word quality for that number (e.g. "Clarity", "Strength", "Expansion")
- A two-sentence interpretation personalised to today's sky (nakshatra + number quality)
- A note: *"Your cosmic number resets at midnight"*

COSMIC NUMBER
ANALYSIS

Quality: WISDOM

"Seven is the number of deep knowing. Today's
Pushya sky amplifies this — trust what you
already understand, even if you can't explain it."

Roll animation

1. User taps "Roll" button (large, tactile)
2. Die face cycles rapidly through 1–9 (300ms, 9 frames at 33ms each)
3. Slows and **lands on the cosmic number** (~400ms deceleration)
4. Number face freezes; quality word fades in; interpretation slides up
5. After reveal: "Roll" button becomes "Rolled ✓" and is disabled for the day

Total animation: ~700ms — feels magical, runs entirely in CSS/JS, no network call.

Number selection algorithm

```
nakshatra_idx = canonical nakshatra index (0–26)
cosmic_number = ((nakshatra_idx + tithi - 1) % 9) + 1
```

This produces a number 1–9. Same sky = same number all day. Changes daily.

Vedic number meanings (the 9-entry lookup table)

Number	One-word quality	Full interpretation template
1	New Beginnings	"One is the number of first steps. Today is favoured for starting — an action taken now carries more force than one taken later."
2	Balance	"Two is the number of partnership. What needs to be weighed, shared, or aligned? Today responds well to cooperation over solo effort."
3	Expression	"Three is the number of creativity and communication. Say what needs saying. Create what wants to be made. Today amplifies your voice."
4	Foundation	"Four is the number of structure and stability. Build something that will last — plans made today have staying power."
5	Movement	"Five is the number of change and momentum. Expect movement in situations that felt stuck. Stay adaptable — the shift is real."
6	Harmony	"Six is the number of beauty and care. Relationships and your environment respond to attention today. Small acts of kindness carry."
7	Wisdom	"Seven is the number of deep knowing. Trust what you already understand, even if you can't fully explain it yet."
8	Power	"Eight is the number of authority and results. Today is for decisions, leadership, and completing what you started."
9	Completion	"Nine is the number of endings that clear the path. Something finishing today is making space. Let it go cleanly."

Storage

```
user_checkins → add column:
  dice_rolled_at: TIMESTAMP nullable    (null = not rolled today)
  dice_number: SMALLINT nullable        (1–9, for analytics/history)
```

The rolled state persists per calendar day (reset at midnight local time). If user rolls, closes app, and returns — they see their result, not a new roll.

Block 17: Tomorrow's Preview + Tomorrow's Intention

AI: NO — deterministic facts + fixed templates.

Visibility: only after 21:00 in the user's local timezone. Before 21:00 this block does not exist on screen.

Tomorrow's Intention (Block 17i — shown directly below Tomorrow's Preview)

After the preview card, a small input block lets the user write their intention for tomorrow:

```

+ Set an intention for tomorrow
[ {tomorrowCard.headline} – what will you focus on?   ]
[                                                         ]
[                                                         ]
[ Set intention ]

```

Behavior:

- Free text textarea, max 280 chars
- Saved to `user_reflections` table with `type = 'intention', target_date = tomorrow`
- On save: textarea is replaced by confirmation ("✓ {saved text}")
- Next morning: on Today page load, if `today == intention.target_date`, show a gentle reminder at the top of the page: "Your intention for today: "{text}""
- No AI involved

Storage:

```

user_reflections {
  user_id, type, target_date, text, created_at
}

```

Block 18: Stories Carousel

No changes from current implementation. Stories are scheduled via admin panel and personalized by nakshatra / moon_sign lookup.

5. Achievement System — Full Spec

Achievements are earned automatically on check-in. All checks run server-side in `POST /checkin`.

Types

- **One-time badges:** earned once, live permanently.
- **Repeatable badges:** can be earned multiple times (accumulate count). Show `× N` on the badge.
- **Milestone badges:** earned at specific streak thresholds, one-time per threshold.

rare_alignment	✨	Rare Alignment	Nakshatra + Tithi + Vaara all match	A few times/year
eclipse_chaser	🌑🌒	Eclipse Chaser	Checked in during lunar eclipse	Very rare
solar_event	☀️	Solstice Keeper	Checked in on solstice or equinox	4 times/year

Category 2: Streak Milestones (one-time per threshold)

Badge ID	Icon	Name	Trigger
streak_3	🔥	First Spark	3-day streak
streak_7	🔥🔥	First Week	7-day streak
streak_14	🌙	Moonwalker	14-day streak
streak_29	🌕	Full Cycle	29-day streak (one full lunar cycle)
streak_90	🌑🌒🌓	Three Moons	90-day streak
streak_180	🌟	Half Year	180-day streak
streak_365	🏆	Year of Stars	365-day streak

Category 3: Time in App — Loyalty Milestones (one-time)

Triggered by `account_age_days` (days since registration), not streak.

Badge ID	Icon	Name	Trigger
<code>loyalty_3d</code>		First Steps	3 days since joining
<code>loyalty_7d</code>		First Week	1 week since joining
<code>loyalty_30d</code>		One Month	30 days since joining
<code>loyalty_90d</code>		Three Months	90 days since joining
<code>loyalty_180d</code>		Half Year	180 days since joining
<code>loyalty_365d</code>		One Full Year	365 days since joining

Category 4: Social & Matching (one-time or repeatable)

Badge ID	Icon	Name	Trigger	Type
<code>first_match</code>		First Connection	First mutual match	One-time
<code>five_matches</code>		Rising Star	5 matches total	One-time
<code>twenty_matches</code>		Star Connector	20 matches total	One-time
<code>compatibility_reader</code>		Cosmic Reader	Viewed compatibility report	One-time
<code>invited_friend</code>		Cosmic Invite	Invited a friend who joined	Repeatable
<code>shared_today</code>		Sky Sharer	Shared Today card to social	Repeatable

Category 5: Events (repeatable per event)

Badge ID	Icon	Name	Trigger
<code>event_checkin</code>		Star Gatherer	Checked in at a Bisou event
<code>event_matched</code>		Event Match	Got a match at an event
<code>event_series</code>		Event Regular	Attended 3+ events

Events are flagged via the existing event check-in system. Badge is awarded when `event_attendance` record is created for a user.

Badge stacking (repeatable badges)

Repeatable badges show count and optionally change appearance at milestones:

Full Moon Witness ×1

→

standard

Full Moon Witness ×3

→

silver glow

Full Moon Witness ×6 → 🌕 gold glow
 Full Moon Witness ×12 → 🌕 with crown (full year)

Visual tiers: Standard → Silver → Gold → Crown (at 1x, 3x, 6x, 12+x).

6. Dynamic Background System

See [Section 3 — Dynamic Background](#) for the full spec, all 20 asset keys, the time-of-day tint system, and the selection algorithm. The background key is stored in `today_summary_cache.background_key` and resolved once per day at midnight.

7. Caching & Performance

Cache strategy

All expensive content is pre-generated nightly at **00:00 local time** for active users via the existing `today-page-pregen` job.

```
today_summary_cache stores per user per day:
- background_key          (deterministic, instant)
- headline_type           (deterministic, instant)
- category_scores [6]     (deterministic, instant)
- category_labels [6]     (deterministic, instant)
- do_tips [3]             (deterministic, instant)
- avoid_tips [3]          (deterministic, instant)
- vibe_text               (AI - 1 call, cached)
- category_explanations   (AI - 6 calls, cached)
- morning_text            (template, instant)
- afternoon_text          (template, instant)
- evening_text            (template, instant)
- tomorrow_preview        (deterministic, instant - rebuilt nightly)
```

AI calls per user per day

Call	Count	Model
Vibe text	1	gpt-4o-mini
Category explanation (on-demand tap)	0-6	gpt-4o-mini
Max total	7	

Category explanations are lazy-loaded: generated only when user taps a category for the first time that day, then cached.

Response time target

- Today page initial load: **< 200ms** (all from cache)
- Category tap explanation (first time): **< 2s** (AI call)
- Category tap explanation (cached): **< 50ms**

8. AI Usage Summary

Block	AI	When generated	Cached until
Day Headline	✗	—	—
Energy Scores	✗	—	—
Energy Labels	✗	—	—
Category Explanation (on tap)	✓	On first tap that day	Midnight
Do / Avoid selection	✗	—	—
Do / Avoid texts	✗	Fixed content set	—
Today's Vibe	✓	Nightly pre-generation	Midnight
Morning / Afternoon / Evening	✗	Fixed template lookup	—
Moon Streak	✗	—	—
Badge award logic	✗	—	—
Tomorrow's Preview	✗	Fixed template lookup	—
Background key	✗	—	—
Stories	✗	Scheduled content	—

Summary: 2 AI touch points per day per user — one vibe text (pre-generated nightly) and up to 6 category explanations (generated lazily on first tap, then cached). Everything else is deterministic and requires no AI call.

Appendix: Determinism Guarantee

Every block that is marked **AI: NO** is fully deterministic:

Given the same `birth_data`, `today_date`, and `user_id`, the output is always identical.

This is ensured by:

- No `Math.random()` anywhere in scoring or selection
- Do/Avoid tie-breaking is by fixed position in the content set (stable sort, earlier entry wins)

- Block 5 texts are selected by a direct two-key lookup: `TEMPLATES[vaara][slot][energy_band]`
 - no arrays, no index arithmetic
- All panchang calculations via Swiss Ephemeris with fixed Lahiri ayanamsa

AI-generated fields (Vibe text, Category explanations) are generated once and cached, so they also become deterministic after first generation for that day.
